

CD-220

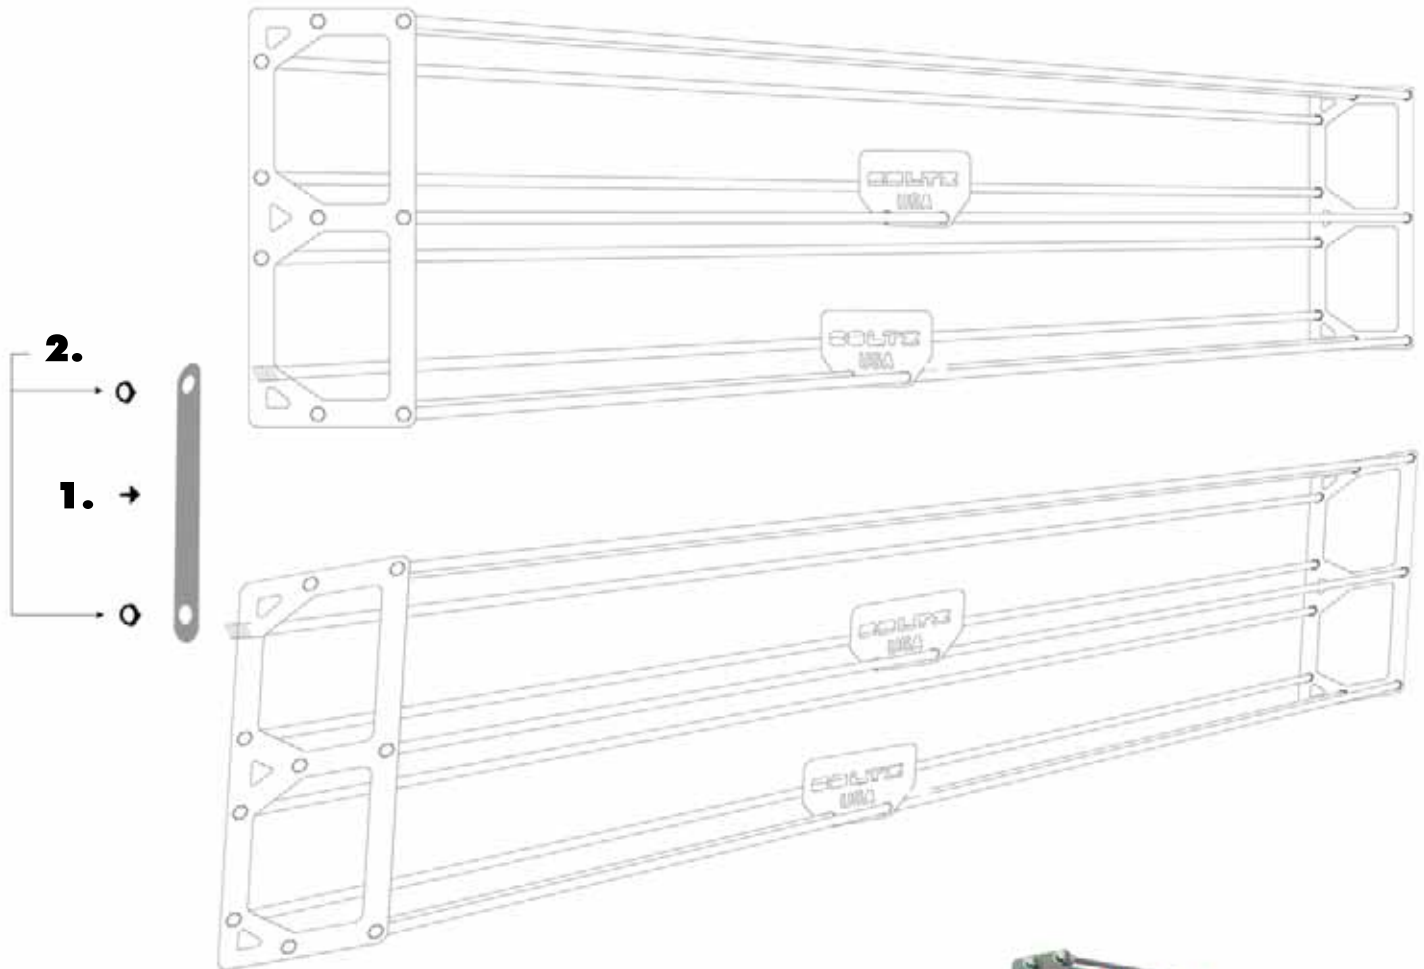

ASSEMBLY INSTRUCTIONS

These instructions will walk you through the process of assembling your CD-220. If you have any questions about your expansion kit, please contact us at 877.804.7650 Monday - Friday 8:00 - 5:30 central time.

STEP 1. Attach the two racks together by placing the connecting plate on the bottom rod of the top rack and the top rod of the bottom rack on both sides. These rods were intentionally left without a cap nut so they would be easy to identify.

STEP 2. Place all 4 capnuts on threaded rod tips to secure connecting plate. Tighten completely.

STEP 3. Nail hangers into wall at desired height. Keep in mind the rack should be hung by the 2nd rod of the top rack and the hangers should be placed close to the outer edges of the rack.

Final product.
